Completed well in Punjab, Pakistan.

Yes! Hydromissions will continue...

So many of you responded to our last email regarding the handing off or shutting down of Hydromissions that it was at the same time humbling, encouraging, and overwhelming. After a lot of prayer and interviews, we are very confident that we have found the right partners to help carry on the mission of reaching people for Christ through water far into the future. Not only that, we believe that these brothers and sisters will use their God-given talents to take the ministry of Hydromissions far beyond anything that we could have dreamed of doing ourselves. The basics and fundamentals of Hydromissions will remain the same, but the outreach will be more efficient and farther reaching. Thanks to all of you for your continued support as we look forward to partnering with you in the years to come. Stay tuned...

PAKISTAN

Our recent trip to the Punjab area of Pakistan was both challenging and fruitful. Working with [Mountain of Jesus Ministries](#), we were able to put in a well for a village of about 200 people. We also learned an entirely new way to drill that we hope will result in new tools for the future. Given the high tension in that country, we were accompanied by 24/7 armed security (SWAT teams) - that was a new one for us. The hope is that, with their own drilling equipment, MJM will be able to continue putting in wells and sharing the gospel to many of the more desperate areas of Pakistan, including those hit by the recent flooding. Thank you all for your prayer and support in making this very successful trip possible.

A typical tent city in Pakistan

HAITI

3 Hydromissions Associates traveled to the island to work with [Hope for the Hungry](#). Although a bit too rocky for hand drilling, the team was successful

in putting in a well for a local orphanage.

COMING UP...

Myanmar/Burma, Brazil, Senegal

Please continue to pray for these upcoming trips as they always require a lot of logistics and preparation. Thanks again for partnering with us to bring clean water to the thirsty in the name of Christ. **From all of us here at Hydromissions, may you have a very merry Christmas and a blessed New Year!**

GADGET CORNER

Fishing Tool. This is a very simple device for fishing things out of a tube well. It consists of a metal bar with 2 or 3 hooks attached to a ring on the end (like keys on a keychain). The hooks can be configured in different ways to suite the item you have to fish out. Always good to have another tool in the toolbox.

PRAYER NEEDS

Direction. As Hydromissions grows please pray for our direction to know what God's desire is and not our own.

Spreading the Word. Many people (especially missionaries and churches) still don't know about the resources available to them through Hydromissions. We want to help as many people as we can. Please have missionaries you know email us if they have water needs. Also, if you have contacts with news reporter, TV, or other ways to get the word out please have them contact us too.

Discernment. We process around 3-5 project requests per day (that's over 1000 per year). Sadly, there are a lot of scammers out there, so it takes a lot of discernment and communication to get to the bottom of who is really in need.

Corporate Partnerships. As we grow and have more Associates, we would like to be able to equip them with necessary field gear. Right now, this is expensive (each individual buys his/her own stuff). We are praying for partnerships with sporting outfitters (DICK's, Academy Sports, etc) to help us defray those costs. If you know of any leads and are willing to ask them on our behalf, please contact us.

WISH LIST

We have a hard time using the word "needs" since we work with so many people in genuine poverty. However, here are some of the things that would really help us out in our mission if you feel led to give. **Thank you!**

Old Computer Mouse Rollerballs. Yup - the 3/4" ball from the older computer mice. We are using these for a new pump design. To save on shipping, just crack open your old mouse and remove the roller.

GPS Unit. Used or new. Something simple to give our Associates a way to locate the well coordinates (we don't need mapping or anything like that).

Used Ink Cartridges. NEW: For an Epson Stylus CX4200. **USED:** Any kind - we can trade them in for credit at some office supply stores, and it really helps cut down on our office expenses.

Donations may be sent to:

Phone: (864) 967-7865
403 Hill Lane, Mauldin, South Carolina 29662

Thank You!

Please note: 100% of your donation goes directly to a water project unless otherwise specified. Like everyone, we have expenses, so funds designated "Where Most Needed" are greatly appreciated.

ANOTHER GREAT OPPORTUNITY!!

We would like to use this space to tell you of a great opportunity for you to partner in sharing the gospel in India. We have drilled 100 wells in Andhra Pradesh and have pastors trained and ready to church plant at those sites. For only \$600, you can support a missionary pastor and his family for one entire year as they church plant in these remote places. This is your opportunity to help reach the ends of the earth for Christ. Simply designate your check "Missionary Pastors."
