Prices of larger sizes of Hand Ice Machines on application.

THE "RAPLIN" HAND ICE MACHINE.

The "Raplin" Hand Ice Machine is constructed on the well-known principle that water will freeze when rapidly evaporated by means of a Vacuum Pump in conjunction with an Absorbent such as Sulphuric Acid.

The "Raplin" is the most simple and reliable machine on the market. It will freeze a carafe of water in three minutes, or make a block of about 1½ pounds of ice in 20 minutes. The machine is also useful for making Ice Creams, Icing Wines, etc., etc.
